

Issue ID	Title	State	Description	Author	Assignee	Due Date	Created At (UTC)	Closed At (UTC)	Labels
1	AppController input.	Closed	App controller contains input requests from the user. This makes the class untestable. Suggest making the request for privileges a separate method that is called by the main class if the login method returns true.	C.M.Finn	K.P.D'Arcy	2019/02/17	2019/02/16 14:56	2019/02/17 22:02	Source Code
2	document in HRDatabase is never assigned throws null pointer in readPersonalDetails.	Closed	if statement at the top of the readPersonalDetails method checks if the employee number matches the staff ID of a document field that is never assigned any values.	C.M.Finn	A.E.Jaffray	2019/03/03	2019/03/03 22:43	2019/03/04 01:07	Source Code
3	Databases need merging	Closed	pd.db and Yuconz.db databases need merging into 1 main database	K.P.D'Arcy	C.M.Finn	2019/03/12	2019/03/08 15:17	2019/03/12 00:48	Source Code
4	AppController infinite loop	Closed	signed in as aja000 -> tried to amend personal details -> selected Emergency Contact -> inputted string e.g "jack jones". Briefly looked up issue -> something to do with .next() function of the Scanner only reads up to the next space.	I.A.A.Ojo	C.M.Finn	2019/03/22	2019/03/19 13:14	2019/03/19 14:47	Source Code
5	Add user fails with SQL Exception.	Closed	Add user SQL statement specifies it will receive 4 parameters, but receives 5 values, so tests fail.	C.M.Finn	K.P.D'Arcy	2019/03/22	2019/03/22 00:16	2019/03/22 03:13	Source Code
6	Second reviewer is not added to database on annual review creation.	Closed	CreateAnnualReview() in HRDatabase, line 295.	C.M.Finn	K.P.D'Arcy	2019/03/22	2019/03/22 15:17	2019/03/22 17:35	Source Code
