Discussed Topics

Use case Diagram Issues

- These issues were where the use case diagram did not match with the description of Yuconz we were given, and are posed as questions to ask Miles Roman.
- Authentication

    - Is manager necessary, as they are a subclass of employee?

- Personal Details

    - Should the user be able to amend their own personal details?

- Review

    - Should HR be able to read review records?
    - Should a being reviewed actor be present?
    - Should the Reviewer be able to create new documents?
    - Should the perform review use case require authorisation?
    - Should perform review include Create New Review record?
